To Whom it Concern:

**Re: Visit of PhD student David Torregrosa-Belen**

This letter is in support of the six month visit, Dec. 2022 to June, 2023, of Phd student David Torregrosa-Belen. The visit is for research work in Continuous Optimization with Walaa Moursi and Henry Wolkowicz, in the Department of Combinatorics and Optimization.
David is a Phd student of Francisco Javier Aragón-Artacho, Department of Mathematics, University of Alicante, Spain. https://sites.google.com/site/franaragon/home. Professor Aragón-Artacho is an international well known young researcher who already has an excellent well established research record https://www.dropbox.com/s/llspwquh3q4vn9n/CV%20English.pdf. His research overlaps that of both research areas of Henry and Walaa in modern optimization algorithms as well as stability analysis.
We (Henry and Walaa) are certain of a mutually beneficial visit for us and our research group.
Sincerely yours,

Henry Wolkowicz (on behalf of Henry Wolkowicz and Walaa M. Moursi).
